

Data Scientist

At E-ON INTEGRATION S.A. we believe that our most valuable asset is our people. They possess great expertise, each in their own area. Amongst us we combine many years of actual experience with precious exposure in solving business problems, re-engineering business processes, automating procedures, and streamlining operations for a significant number of companies in various industries.

Since 1999 when we were founded, we have been developing innovative solutions to help our customers achieve better results by utilizing the full extent of state-of-the-art information technologies and communications.

We seek Data Scientist(s) / Data Engineer(s) to join our ranks and participate in new and exciting cutting-edge projects but also be an active member of the development team that maintains and expands existing Business Applications.

You are the ideal candidate if you are efficient, determined, and resourceful and you possess technical and statistical skills.

Responsibilities

You will be involved in the following activities:

- Help our clients solve DW/BI/AI challenges through active listening and bringing solutions to problems.
- Develop, maintain, and optimize Data ETL/ELT and ingestion pipelines in the cloud.
- Execute queries using Azure Machine Learning and Databricks.
- Monitor and optimize the DS/ML microservices.
- Build/improve data-driven models using statistical and machine learning techniques.
- Deploy solutions in production.

Requirements

We would like you to have:

- BSc in Computer Science, Mathematics, Physics, Engineering, or other related discipline
- Knowledge of Machine Learning frameworks and concepts like regression and classification and supervised and unsupervised learning methods
- Knowledge of Python
- SQL knowledge
- Problem-solving skills
- Excellent written and verbal communication skills
- Experience in visualizing/presenting data
- Strong command in the English language
- Attention to Detail

What we Offer

- You will get a competitive salary and a private medical plan

Digital Marketer

At E-ON INTEGRATION S.A. we believe that our most valuable asset is our people. They possess great expertise, each in their own area. Amongst us we combine many years of actual experience with precious exposure in solving business problems, re-engineering business processes, automating procedures, and streamlining operations for a significant number of companies in various industries.

Since 1999 when we were founded, we have been developing innovative solutions to help our customers achieve better results by utilizing the full extent of state-of-the-art information technologies and communications.

We seek a Professional in Digital Marketing to join our team and contribute to innovative, cutting-edge projects. As a key member of our development team, you'll not only work on exciting new initiatives but also play a crucial role in enhancing and expanding our existing suite of Business Applications.

This is a full-time on-site role for Digital Marketing located in Athens. The Digital Marketer will be responsible for day-to-day tasks such as marketing, communication, and social media marketing. Other duties include web content writing and web analytics.

Key Responsibilities:

- **Digital Campaign Management:** Develop and implement digital marketing campaigns across various channels, including social media, email, SEO, and paid advertising. Monitor campaign performance, analyze metrics, and optimize for maximum effectiveness.
- **Content Creation and Optimization:** Create compelling and targeted content for online platforms. Optimize website and social media content for SEO, ensuring high visibility and organic traffic growth.
- **Social Media Management:** Manage and grow our social media presence across platforms. Develop and execute social media strategies that align with overall marketing goals. Monitor trends, engage with followers, and drive community engagement.
- **Email Marketing:** Plan and execute email marketing campaigns to nurture leads, retain customers, and drive conversions.
- **Analytics and Reporting:** Utilize analytics tools to track and analyze the performance of digital marketing efforts. Prepare regular reports on key metrics, providing insights and recommendations for optimization.
- **Collaboration:** Work closely with cross-functional teams, including design, content, and product teams, to ensure seamless integration of digital marketing initiatives.

Qualifications:

- Bachelor's degree in Marketing, Communications, or a related field.

Front-End Developer

At E-ON INTEGRATION S.A. we believe that our most valuable asset is our people. They possess great expertise, each in their own area. Amongst us we combine many years of actual experience with precious exposure in solving business problems, re-engineering business processes, automating procedures, and streamlining operations for a significant number of companies in various industries.

Since 1999 when we were founded, we have been developing innovative solutions to help our customers achieve better results by utilizing the full extent of state-of-the-art information technologies and communications.

We now venture into innovative projects of AI, Machine Learning and Data Analytics, while maintaining and enhancing our presence in the existing portfolio of Products and Services (see: <https://www.e-on.gr/products>).

For these, we seek a Front-End Developer to join our ranks and participate in new and exciting cutting-edge projects but also be an active member of the development team that maintains and expands existing Business Applications.

You are the ideal candidate if you are efficient, determined and resourceful and you possess technical skills.

Requirements:

- BSc in Computer Science, Mathematics, Physics, Engineering or other related discipline
- Knowledge of fundamental front-end languages such as HTML, CSS, JavaScript and Typescript
- Familiarity with JavaScript frameworks, preferably Vue
- Problem-solving skills
- Excellent written and verbal communication skills
- Experience in visualizing/presenting data
- Strong command in English language
- Attention to Detail

What we Offer:

- You will work in a challenging and rewarding environment
- We encourage team spirit and cooperation
- You will participate in innovative large- scale projects
- You will interact with customers and contribute to presentations
- There will be opportunities for personal growth
- You will get a competitive salary and a private medical plan
- You will be entitled to bonuses on performance and value
